

HAND DRYER

An economical and efficient solution for hand drying.

We provide a safe and efficient hand drying system, with lower costs associated and environmentally focused.

Our Wind Pro Turbo includes the HEPA filter that absorbs 99% of the contaminating air particles.

Thanks to the infrared automatic hand detection system, there is no need of contact eliminating the cross contamination risk.

WE PROVIDE A **SAFE AND EFFICIENT** HAND DRYING SYSTEM

Benefits

1

With the antibacterial high efficient HEVA filter which holds 99% of the potential present bacteria.

2

Advanced technology that shortens the drying time.

3

It reduces waste accumulation and cost associated to hand drying minimizing waste management need.
